PROFESSIONAL SUMMARY

I am a highly motivated Data Analyst graduate with a Bachelor of Information Technology and a Major in Business Information Systems (June 2025) who wants to use great skills in data processing, cleansing, and analysis to help people make smart decisions. Skilled in SQL, Python, Excel, and Tableau, with hands-on expertise in data collection and transformation shown by the creation of a GP Appointment System in capstone project during academic journey and the completion of important industry job simulations (Commonwealth Bank, BCG). Four years as a home tutor helped me develop great problem-solving and communication abilities.

WORK EXPERIENCE

Home Tutor | 2018-2022

- By looking at student performance data (such test scores, homework completion rates, and assessment scores) in a systematic way, I was able to find learning gaps and tailor the curriculum to meet those needs.
- Managed and organised a regular group of 10 to 12 long-term clients each week, making sure that customised teaching sessions and materials were delivered on time. This showed that I was organised and responsible.
- Used advanced math and statistics ideas (including probability and regression analysis) to construct clear, logical frameworks that helped students tackle hard math and physics issues on their own.

TECHNICAL SKILLS

Databases & SQL:

MySQL | PostgreSQL | SQL Server | SQLite | SQL Joins & Subqueries | Window Functions | CTEs | Views | Stored Procedures | Indexing & Query Optimization | ERD Design | Normalization | Data Modeling | CRUD Operations | Database Backup & Import | phpMyAdmin | SSMS

Data Analysis & Visualization Tools:

Tableau (Dashboards, Storytelling, Calculated Fields, LOD Expressions) | Power BI (Basics) | Matplotlib | Seaborn | Plotly | Excel Charts & PivotTables | Descriptive Statistics | A/B Testing | KPI Tracking | Trend Analysis | Dashboard Design Principles | Knime Analytics Platform

Excel & Spreadsheet Skills:

Advanced Formulas (VLOOKUP/XLOOKUP, INDEX-MATCH, SUMIFS, COUNTIFS) | Pivot Tables & Pivot Charts | Power Query | Data Cleaning | Conditional Formatting | Data Validation | What-If Analysis | Forecasting | Macros | Basic VBA | CSV Cleaning & Transformation | Gantt Chart

Programming & Automation:

Python (Pandas, NumPy, Matplotlib, Seaborn) | Data Cleaning | ETL Scripting | API Integration | JSON Handling | Regex | Basic Machine Learning (scikit-learn) | Jupyter Notebook | VS Code | Git & GitHub Version Control

Data Pipeline, ETL & Reporting:

CSV/Excel/JSON Data Preparation | SQL-to-Python Data Pipelines | Tableau Prep (Basic) | Automated Reporting Scripts | Batch Processing | Scheduled Jobs | Data Quality Checks | Documentation & Insights Reporting

Business Intelligence & Tools:

Tableau | Power BI (Basic Reports) | Google Data Studio (Looker Studio) | Excel Power Query | Jupyter Notebook | Notion | MS PowerPoint (Data Storytelling) | Confluence | Jira

ACADEMIC HISTORY

Liverpool International College | 2017-2019

Year 11 and Year 12 | Major in Science

- GPA: 3.3
- Recognition for comprehensive practical labs

Sydney International School of Technology and Commerce | 2022-2025

Bachelor in Information Technology | Business Information System

- GPA: 5.71
- Capstone Project - GP appointment scheduling system
 - Cisco, Jira, Figma, Tableau, Knime analytics,

CERTIFICATIONS

Introduction to Data Science Job Simulation | Commonwealth Bank

Data Aggregation and Analysis
Data Anonymisation
Propose Data Analysis Approaches
Designing a Database

Introduction to Data for Decision Makers Job simulation | BCG

Campaign Performance analysis
Communicating Findings

SQL for Data Science | University of

California, Davis Extracted specific data subsets using SQL.

Filtered, sorted, and summarized data with SQL commands.

Combined query results using UNION.

Use string, date, and numeric functions to clean and format data for analysis.

Introduction to Data Analytics | IBM

Explained Data Analytics and its key process steps..

Described data structures, formats, and sources.

Outlined the data analysis workflow: collect, wrangle, mine, visualize.
